INTRODUCTION

I'm a Full Stack Software Developer with experience in developing web applications and systems from scratch, from requirements gathering, system design, development, testing, deployment, up to maintenance.

My main tech stack includes:

Backend: PHP (Laravel), Java (Spring Boot)

Frontend: Vue.js, JavaScript, jQuery, HTML, CSS, Bootstrap

Database: PostgreSQL, MySQL

API Development: RESTful APIs

Version Control: Git/GitHub

AI & Automation: Microsoft Copilot Studio, OpenAI (ChatGPT), Claude, Google Gemini, Microsoft Power Automate, Dataverse

Deployment & DevOps: Docker, Linux (Ubuntu), Nginx/Apache, AWS (EC2, RDS, S3), Azure

Other Tools: Composer, Vite, npm, Postman

EXPERIENCE / PROJECTS (9 years of Experience in the IT Industry)

CRESS MIRAI INC – Senior Software Engineer

October – PRESENT

- Develop, maintain, and support enterprise applications for Japanese clients, including Rental, Schedule Management, and Delinquent Management systems.
- Build internal solutions using Microsoft Power Platform (Copilot Studio, Dataverse, and Power Automate).
- Develop Microsoft Teams Bots and Teams Tab applications integrated with Microsoft Azure services.
- Design and implement cloud solutions using Azure Functions, Azure Bot Service, Microsoft Entra ID Authentication, and Azure Static Web Apps.
- Collaborate with Japanese clients to analyze requirements, troubleshoot issues, and deliver technical solutions.
- Lead and mentor junior developers through technical guidance, code reviews, and task coordination.

Integratr Corporation – Senior Software Engineer, Full Stack

February 2, 2022 – October 2024

- **E-Government System** – Local Government System in the Philippines
 - o **Backend** – PHP Laravel Framework, Docker, PostgreSQL, AWS, Microservice APIs
 - Lead the architecture of the system,
 - Write, review and maintain high-quality code
 - Integrated third-party services (payment gateway)
 - Introduced and implemented Test Driven Development
 - Ensure code quality through code reviews, unit testing and integration testing
 - o **Frontend** – Vuejs 3, JavaScript, Node JS
 - Review and provide feedback on design documents and proposals.
 - Integrated API backend needed in the application

- Build UI/UX for the platform following the design
 - Build CI/CD actions for build testing.
- o **Lead – ClickUp**
 - Lead and mentor team of software engineers.
 - Evaluate and recommend new technologies, tools and processes.
 - Translate business requirements into technical specifications.

- **GAB Combat Sports** – website for government regulatory board of professional sports.
<https://gab-combatsports.com/>
 - o **Backend – PHP Laravel Framework, AWS, MariaDB**
 - Managed all backend tasks and DB structures
 - Review pull request of development team
 - o **Frontend – Bootstrap 5, CSS3, AJAX, JQuery**
 - Integrated API backend needed in the application
 - Build UI/UX for the platform following the design
 - Review codes using GIT pull requests
 - Integrated Google Analytics and managed API Documentation
- **Augmentation Technical Development: AppendPay (Multisys Corporation)** – Outsource Developers on Multisys Corporation
 - o **Backend – PHP Lumen, microservice, Test Driven Development, PostgreSQL, Docker, AWS, RESTful API**
 - Integrated payment gateway (Multipay)
 - Developed Backend API needed for the system
 - Integrated third-party microfinance institution (TSKI)
 - Build and Deploy Docker images to AWS EC2

Integratr Corporation – Software Engineer Consultant

Sept 2020 – January 2022

- **Multipay (Multisys E-Commerce Platform)** | <https://www.multipay.com.ph/> - payment gateway
 - o **Backend - PHP Lumen, microservice, Test Driven Development, PostgreSQL, Docker, AWS, RESTful API**
 - Integrated billers available for payment
 - Developed API microservice for integrating billers
 - Implemented test-driven development.

ABC System Solutions Inc – Software Engineer, Lead

October 2016 – September 2020

- **Mayon Machinery Rentrade Inc** - Enterprise Management System
 - o **Backend – PHP, Laravel Framework**
 - Build backend services for the platform
 - Architected backend API and database structures
 - Review pull requests on development team
 - o **Frontend – Vue JS, Javascript**
 - Build UI/UX for the web platform
 - Fix Bugs and code quality
 - o **Lead – JIRA**
 - Managed Tickets and Sprints using SCRUM methodologies

- Managed System Analysis and provide System Flow
 - Facilitated DSU (Daily Stand Up) Meeting and managed tickets dependencies and blockers.
- SERBIS.PH – Mobile Application for service provider request system
 - Backend – PHP, Laravel Framework, Socket IO
 - Build backend services for mobile and web platform
 - Integrated Google Map.
 - Build Socket IO server for real-time notification and messages
 - Frontend – Ionic Framework, Typescript
 - Build UI/UX for the mobile platform following the design

EDUCATION

Bachelor's Degree in Information Technology

Bulacan State University, Philippines

2012 – 2016

Secondary Education

Lolomboy National High School

2006 – 2010

Primary Education

Lolomboy Elementary School

2000 - 2006
